Dhaka

Education is the driving force to happen the sustainable development of any country. Bangladesh is striving for ensuring quality and world standard education coping with the changes of the globe.

I am highly pleased to know that Bangladesh Bureau of Educational Information & Statistics (BANBEIS) is going to publish the Education Statistics-2014, report on the basis of collected data through online Annual Education Survey-2014. Though the BANBEIS has been publishing this education statistics from its very inception, it is a challenging task. The primordial objective of the survey is to generate essential information and establish database which plays a vital role in formulating short & long term policies and accelerate the development strategies. I hope this attempt will provide adequate information to the stakeholders and determine the strategies for the Seventh Five Year Plan and Annual Development Program (ADP) to achieve the goal of Vision-2021. Obtaining information from this survey could be used for reviewing the progress in education sector in Bangladesh specially in Education for All (EFA), Education for Sustainable Development (ESD) & Millennium Development Goals (MDGs) and different national Social Protection Strategies (NSPS).

I express my ingenious thanks to the team who are involved in the process of conducting this survey as well as publication of this report. I also express my heartiest appreciation to the Director of BANBEIS whose dynamic and robust leadership was inevitable to complete this laborious job.

(Md. Nazrul Islam Khan)

Preface

The main responsibility of BANBEIS is to collect, analyze, compile data and publish educational statistics covering all levels in the post primary sector. This organization also disseminates education statistics published by the Directorate of primary Education (DPE). Since various levels and areas of education are inter related, it is necessary and prudent to publish all pertinent statistics on education in a single publication.

The annual report entitled 'Bangladesh Educational Statistics-2014' is an attempt to publish educational statistics at all levels for the year 2014. This document comprises data collected from all post primary educational institutions through on line (self responding). Every educational institute updated the respective database information on line and sent it through internet. Quality Assurance(QA) process took place for validation. Databases have been developed in ORACLE 11g using PHP and JAVA. We made all efforts to present the comprehensive and quality statistics, which will hopefully be useful for purposes of educational planning and management.

This report can be used as a basis for educational planning and future investment by the Government, NGOs and private sectors as well as by the Development Partner's Communities in Bangladesh. I would like to express my gratitude to the officers & staff concerned of this Bureau who have contributed in preparing this valuable report. The field officers (DEO and USEO) have provided significant inputs in the process. I express my gratitude to all of them.

In spite of the best efforts some inadvertent errors may have crept into the report. Any Pragmatic Suggestion and/or Corrections pointed out will be highly appreciated and proper measure will be taken in preparing the next edition.

Data definition

Enrolment: Number of students officially enrolled in a given grade or level of education regardless of age.

Class Size : Average number of students together in a class enrolled.

Teacher Student Ratio (TSR): Refers to the proportion of teachers in relation to the number of students in an institution. Calculated by dividing the total number of students in a school or group of schools by the total number of teachers teaching them.

Urban Area: Refers to the area covered by municipalities, Upa-zila Head Quarters, District Head Quarters and City Corporations in the country.

Cohort survival rate: percentage of students enrolled at the beginning grade/ year of the level of education who reached the final grade/year at the end of the required number of years of the level of education.

Drop-out Rate: refers to the percentage of students for any reason leave educational institutions(in any given grade or level) and did not come back to finish the grade or level during that school year to the total number of students enrolled during the previous school year.

Completion Rate: The percentage of students enrolled at the beginning grade/year of the level of education who finished or graduated from the final grade/year at the end of the required number of years of that level of education.

Graduation rate: The percentage of pupils/students in the last grade/year of that level of education who completed and passed the academic requirements of that last grade/year.

Gross Enrolment rate: Refers to the total enrolment of students in a grade or level of education, regardless of age, expressed as percentage of the corresponding eligible official age-group population in a given school year.

Net Enrolment Rate: Refers to the number of students enrolled in the official specific-age group expressed as a percentage of the total population in that age group.

School age Population: Population of the age group theoretically corresponding to a given level of education as indicated by theoretical entrance age and duration e.g the population from ages four to thirty inclusive regardless of the existing requirements of compulsory education or the period of education provided for in various types of schools.

Co-efficient of efficiency: It is a ratio of expected student years required to complete the cycle by the graduates and the total years actually spent to produce those graduates expressed in percentage terms.

The ideal (optimal) number of pupil-years required (i.e. in the absence of repetition and dropout) to produce a number of graduates from a given school-cohort for secondary education expressed as a percentage of the actual number of pupil-years spent to produce the same number of graduates.

This is a synthetic indicator of the internal efficiency of an educational system. It summarises the consequences of repetition and dropout on the efficiency of the educational process in producing graduates.

Executive Summary

Introduction: In view of the importance of education in the development of the country, the government has been giving top most importance for the expansion of education. For the past decade Bangladesh has been investing heavily to achieve the education Millennium Development Goals. Besides reducing poverty, Bangladesh has made spectacular success in improving access to education. The gross enrolment ratio in primary education in 2014 has reached 108% and net enrolment rate 97.7%. The gross enrolment ratio in secondary education in 2014 reached 55.84% while net enrolment rate 50.27%. Bangladesh has achieved gender parity for educational access in both primary and secondary education (well in advance of their 2015 MDG). The number of out of school children has been continuously decreasing both in absolute and relative term. The Bangladesh education system is large, catering to over 37 million students (2014), involving many stakeholders (for example there are 14 types of providers in primary education, 10 examination boards at the secondary levels, about 98.33% secondary educations are privately managed).

The education system of Bangladesh is comprised of a mix of heterogeneous providers. A variety of schools operate within the country; government run schools, privately run schools and madrasah, English medium schools, schools run by NGOs and kindergarten schools. Primary education spans grade 1-5; Junior secondary grades 6-8, secondary grade 9-10, higher secondary grade 11-12 and tertiary education grades 13 and above.

Bangladesh has a centralized Education system administered by the Ministry of Education (MOE) and the Ministry of Primary and Mass Education (MOPME). The MOPME and DPE are responsible for planning and management of primary, mass and pre-primary education. The MOE, DSHE and DTE are responsible for post-primary education. The MOE and UGC look after the overall management of higher education.

For the planning and development of the education sector, the ministries need a strong quality data base. With a view to up-dating the data base, BANBEIS regularly conducts post-primary education surveys. The base-line survey was conducted in 2008 after that the annual survey was conducted in 2009, 2010, 2011, 2012, 2013 and 2014. The purpose of Bangladesh education survey is to provide up-dated educational information and key performance indicators to the policy makers and other stakeholders. The scope of annual survey-2014 was very broad. All the educational institutions imparting post primary education were covered.

The present report based on educational survey 2014 data doesn't fully address issues such as management, governance, equity and non-teaching staff. The socio-demographic characteristics of students and teachers were not considered. One limitation of the survey is the difficulty in obtaining data from English medium schools and Universities. The Survey methodology was similar to the one adopted in 2014 Survey (Details are given in the chapter one). The 2014 annual education Survey used 10 questionnaires, one for each type of institution. The questionnaires were pretested before finalization.

Questionnaires were up-loaded to Website viz; www.banbeis.gov.bd to fill up and sent to BANBEIS server through One-line. The data collection started on 01.10.2014 and continued up to 30.12.2014. Editing was done at field (USEO office) and head office to ensure quality of data. Besides, Post Enumeration Check (PEC) was done for School, College and Madrasahs to minimize errors. In PEC a total of 620 Institutions were covered. Comparing the findings of the main Survey data with those of PEC it was found that the main survey data were reliable and valid. According to the Education Survey 2014, there were 146240 Educational institutions in the country. This number was 144124 in the year 2013.

Primary Education:

The Bangladesh primary education system is large, catering to 19.55 million students in 2014 through 14 types of providers. Among them the government primary school alone covered 14.67 million (75%) students. The number of girls students was 9913884(50.70%). The GPI was more than 1.00 (1.03%). In 2014, total teachers were 4.82 lacs. Female teachers were 57.8% of all teachers. Variation was observed between types of primary education institutions (Table 2.1)

The Survey collected data on Pre-primary education enrolment from 7 types of institution (Table-2.2). The total pre-primary enrolment was 20.6 lacs, among them 10.06 lacs(49.7%) were girls. Drop-out was prevalent in every grade, the rate was higher in grade 2, 3 and 4 (Table 2.12)

Apparent intake rate (AIR) and net intake rate (NIR) was 108.7% and 97.9% respectively. Small difference was observed between boys and girls. Gross enrolment Ratio (GER) and Net enrolment Rate (NER) in primary education have been increasing during the past decades. GER was 94% in 2005, and reached 108% in 2014. GER of girls(112.3%) was higher than that of boys. NER in primary education was 87% in 2005 and increased to 97.7% in 2014. The growth was spectacular and confirms continuous increase of access of school age children to education.

Drop-out rates has been continuously decreasing from 47% in 2005 to 20.9% in 2014. Compared to boys, girls drop-out rate was lower (Table 2.11) District wise variation was remarkable. Repetition rate ranged between 2.8% and 10.2% between grades, highest in grade 4 (10.2%). Survival rates has shown a continuous growth trend (from 54% in 2005 to 81% in 2014)

As a result of increasing growth of access, retention and survival of students the primary education coefficient of efficiency rate has been increasing from 63% in 2005 and rose to 80% in 2014. In 2009 pass rate in primary completion examination was 89% (88% for girls). The pass rate increased to nearly 99% (for both boys and girls) in 2014.

Junior, Secondary and Higher Secondary Education:

Total institutions offering Junior and Secondary Education were 19684 in 2014. The number of institutions in this subsector was 12012 in 1995, has been smoothly increasing. Side by Side the enrolment and teachers also increased. In 2014, the total enrolment was 9.16 million among them 4.87 million (53%) were girls giving gender parity index 114%. Number

of students per institution was 465 in 2014. Total teachers were 2.33 lac with 58969 female teachers. The percentage of female teachers was 25% in 2014 and 20% in 2005. In 2014, teacher-student ratio (TSR) was 39 and average number of teachers per institution was only 11.8. Among all teachers 62.32% were trained. This percentage was 27.36% in junior schools 66.2% in Secondary and 75% in higher secondary institutions.

In the total institution in 2014 the share of Junior Secondary institutions was 13%, Secondary institutions 83%, School and Colleges offering Higher Secondary 4%. Among all institutions (19684), more than 98% (98.4%) were privately managed and only 1.6% was publicly managed. Rural-Urban distribution reveals that in 2014, 77% institutions were located in rural areas, 69% teachers were working in the rural institutions, and 71% student was studying in rural institution.

The distribution by division reveals unequal distribution. As regards number of institutions, Sylhet had only 5% while Dhaka had 26% of all institutions. As regards enrolment the share of Sylhet was 5.9% while Dhaka had 31.1% (Table 3.1.3/b).

The 2013 Education Survey reveals that 81.4% of all institutions had electricity facility; the percentage was 45% in junior secondary schools, 86% in secondary schools and 97% in higher secondary institutions. Number of institutions having multimedia was 58%. This percentage was 8% in Junior Schools, 65% of secondary and 79% of higher secondary institution. Relatively more institutions had computer facility; 30% of junior secondary, 85% of secondary, 99% of higher secondary, 79% of all institutions. Table 3.5.4 gives an account for the use of teaching materials. It is seen that nearly 99% institutions reported use of teaching materials.

The number and percentage of institutions receiving MPO is shown in Table 3.5.5. It is seen that 24.21% of Junior Schools, 90.98% of Secondary Schools and 83.65% of HSE institutions received MPO support. It is reported that 60% of all institutions offered computer education. This percentage was 19% for junior schools, 64% for secondary schools and 96% for higher secondary institutions. It is found that only 59% institution had computer teacher in 2013. It is found that some institutions offered computer education even without computer teacher.

In 2014, the gross enrolment ratio in secondary schools rose to 55.84% from 43.1% in 2001, the gross enrolment rate for boys in 2014 was 50.89%, significantly lower compared to GER for girls 61.06%. In 2014, the NER in secondary schools was 50.21% (boys and girls together), 46.12% for boys and 50.52% for girls. In the total enrolment in grades vi-x of 9160365, boys were 4285281 (46.78%) and girls were 4875084 (53.21%). Gender parity index was 114% (Table 3.1.2d). Significant improvement took place in efficiency parameters. In 2014, the completion rate was 58.06% (55.6 in 2013), 65.98% for boys (58% in 2013), 51.62% for girls (50% in 2013). The drop-out rate reduced to 41.94% in 2014 from 44.4% in 2013. However the survival rate go up from 62% in 2013 to 63.83% in 2014. The coefficient of internal efficient index rose to 70.30% in 2014, from 65% in 2013. The co-efficient confirm improvement in the performance of secondary and higher secondary education during the past decade.

College Education:

The institutions offering post higher secondary education are included in college education. The following types are recognized. Intermediate colleges, degree colleges, Honors Colleges and Masters Colleges. The total institution involved in college education have been increasing. The number was 3150 in 2005, 3324 in 2010, 3547 in 2012, 3793 in 2013 and 3985 in 2014. Majority (92.54%) was privately managed and 7.46% were government managed.

There are two types of colleges; one is of coeducation type and the other is exclusively for girls students. In 2014, there were 679 colleges (17%) exclusively for girls. The share of intermediate college was 51.4%, degree colleges 34.32% and the remaining 14.29% were honors and masters College. The total enrolment in 2014 was 3.5 millions. Among them 1.06 millions (47.57%) were girls. Gender parity index was 89%. The share of intermediate colleges in total enrolment was 16.85% degree pass 31.32% degree honors' 22.25% and masters 29.58%. In 2014 a college had on average 880 students, the highest 7682 in masters colleges and lowest in intermediate colleges.

Total teachers in 3985 colleges are 105054. Among them 23% are female, Small variation in between types of colleges. The teacher-student ratio is 1:33 highest in masters colleges (1:101) and lowest in intermediate colleges. Number of colleges enjoying MPO was only 2737, 69% of the total.

The drop-out and completion rate in colleges (xi-xii grades) in 2014 are presented in Table 4.1.6. The cohort drop-out rate was 41% in 2000, reduced to 23% in 2014. The survival rate increased to 97% in 2014. The coefficient of efficiency was 74.9%. Gross and Net Enrolment Rate in college in xi-xii grades are 41.68% and 28.66% respectively. The GER of girls is 46.63% in 2014 and of boys are 37.73%. The NER of girls (32.93%) was also higher than boys (25.24%).

Number of colleges, teachers and enrolment was found to vary across divisions. The highest percentage of students was in Dhaka division (33%) followed by Chittagong (17.66%). The lowest was in Sylhet (5%). Rural and urban distributions reveal greater inequality between the two. In the overall distribution of population nearly 25% live in urban areas and 75% live in rural areas. Education survey 2014 reveals that only 53% institutions are located in rural areas, covering only 29% of all students.

There were 3985 colleges in 2014. The survey shows that 3195 colleges (84%) have principal. Among them 7% were female. Vice principal was only in 953 (25%) colleges. Professors were 519 (0.13 professor /college). Associate professors were 2383 (0.63per institution). Assistant professors were 16826 (4.43 /institution), Lecturers were 66184 (17.4 per institution).

All the institutions do not have the librarian and or assistant librarians. In 3985 institutions there were 3641 librarian or assistant librarian. i.e. 4% institution on average did not have any librarian. Among all institutions 96% had electricity, 74% had multimedia facility, 50% had desktop computers, 43% had laptop and only 90% had computer internet and 7.28% had solar panel.

Madrasah Education:

Madrasah education is a subsector of education sector of Bangladesh. This subsector is also large, catering to over 3.78 million students including Ebtedayee. This is popularly known as religious stream quite distinct from general stream. This subsector has been continuously growing. The total institutions offering post-primary (Ebtedayee) madrasah education was 7279 in 2000 rose to 9341 in 2014. Ebtedayee madrasah offers primary equivalent while post-primary madrasah covers Dhakhil, Alim, Fazil and Kamil; Which are equivalent to secondary, Higher Secondary, Degree and Masters Education of general stream.

The total institutions offering Ebtedayee madrasah in 2014 were 13570. Among them 9154 were attached Ebtedayee and 4416 were independent Ebtedayee. Total students in 13570 institutions were 2125306 in 2014. Average students per Ebtedayee was 157. The total girls students were 1075981, 50% of all students. The total teachers in 13570 Ebtedayee madrasah were 51167, on average 3.77 teachers per Ebtedayee. Women teachers constituted 14.1% of all teachers. Teacher-student ratio was 1:42.

In 2014 a total of 9341 madrasah offered Dhakhil to Alim education. Madrasahs are absolutely privately managed. Dhakil, Alim and Fazil are privately managed. Out of 219 kamil madrasah only 3 were Government madrasahs. Among 9341 madrasahs 9338 (99.97%) were privately managed. Among 9341 madrasahs 70% were dakhil, 16% were Alim, 11% were Fazil and 2% were kamil. In 6582 Dakhil Madrasahs, total students were 1290014; more than 59% were girls. Average students per institution are 196. Total teachers were 65014, the average teacher per institution was 9.88. Teacher-student ration was 1:20.

There were 1482 Alim Madrasah with 450534 students and 22160 teachers. Girls students were 54.6%. Female teachers were 11.65 percent. Average students per institution was 304 and average teacher per institution is 14.95 persons. Teacher student ratio was 1:20. In 2014 total Fazil madrasah was 1055 with 449329 students and 18758 teachers, Girls students were 46.6%. Female teachers were 10.48%. Average student per institutions was 426 and average teacher was 17.78, giving teacher-student ratio 1:24. There were 222 kamil madrasah in 2014 with 176495 students and 4860 teachers. Girls constituted 30.30% of total enrolment. Female teachers were 8.68% of total. Average students per institution was 795 and average teachers was 21.89, yielding teacher-student ratio 1:36.

The distribution of madrasahs by division reveals that 21% madrasahs were located in Dhaka, 16% in chittagong 17% in Rajshahi, 16% in Rangpur, 13% in Khulna, 13% in Barisal and 4% in Sylhet. Rural-Urban distribution shows that 87% of all madrasahs were located in rural areas. Variation between types of madrasahs and the rural share was as follows: Dhakil 90% Alim 83%, Fazil 80%, Kamil 40%. Most of the madrasahs (68%) prepare annual development plan, conduct co-curriculum activities, Madrasah (99%) run in one shift only, about 50% madrasahs use computer for academic purposes, 64% madrasahs have separate library. Only 22% madrasahs have science laboratories and 4.92% madrasahs have Ramp for special needs student.

All madrasahs did not offered computer education as subject. On average 43% madrasahs offer computer education. Variation across the types of madrasahs is shown in Table 5.2.6.

Among all teachers only 20% teachers were trained. This percentage varies between 15% in kamil and 21% in Dakhil. Percentage of female trained teacher is 19% which is lower than percentage of male trained teacher.

Nearly 95% Heads of madrasahs are appointed while 5% are acting heads variation between types of madrasahs was observed. Among all teachers 80% were receiving MPO in 2014. This percentage was 70% in case of female teachers. Number of teachers having NTRC was few. Among 110792 teachers only 15077 (14%) have NTRC.

In Dakhil, Gross Enrolment Ratio (GER) was 12.21 for both sex, 10.59 for boys and 13.92 for girls. The NER was very close to GER. NER was 10.89 boys 9.37 girls 12.48. It is to be mentioned that majority boys and girls of school age children go for secondary school. The Gross enrolment and NET enrolment ratio at Alim level was very low, this is 4.92% and 4.50% respectively.

There was small difference between boys and girls GER and NER (Table 5.3.11). Estimates of internal efficiently parameters reveal that completion rate was 53% (Girls 45% only) in Dakhil, Drop-out rate was 47% (girls 57%) survival rate 70.79% (girls 61%) and co-efficient of efficiency was 61% (girls 52%). In Alim (Higher secondary level), the completion rate was 87% (girls 76%), dropout rate 13.22% (girls 30%) survival rate 94% (girls 93%) and coefficient of efficiency 89% (girls 71.60%). The above estimates reveal that girls lack behind the boys in participation in the education process.

Professional Education:

Professional institutions include 11 types of institutions. These are Medical College, Dental College, Nursing College, Homeopathic College, Unani/Ayurvedic, Nursing institute, Health Technology, Textile Technology, Leather Technology, law and Art Colleges. In 2014 there were 476 professional institutions in the country. This subsector has been growing. In 1995 total institutions were only 150. This number increased to 199 in 2003 and to 476 in 2014 (Table 6.1).

Among 476 institutions 23% were public and 77% were private. The rate of growth has seen higher in private professional institutions. The total students in 11 type of institution were 122165 in 2014 and 51789 in 2003, showing a continuous growth in the past. Among all students 39% were girls in 2014. Gender parity index was only 63%. The number of students per institution was 256 in 2014, this number was 287 in public and 248 in private institutions. Among all students, percentage of students in medical college was 34%, 16% in Homeopathic College, 22% in health technology 15% in law college, 10% in nursing institutes and 3% in other 5 types of institutions.

In 2014, there were 8185 teachers. Among them 1521 (18.6%) were female teachers. GPI was very low, only 23%, teacher-student ratio was 1:13.9. Percentage of female teachers was different in different institution, lowest (3%) in law college and highest (78%) in nursing college. Division wise distribution shows that 47% institutions were in Dhaka, 14% in Chittagong, 14% in Rajshahi, 9% in Khulna, 7% in Rangpur and 4% each in Sylhet and Barisal.

Teacher Education:

Seven types of educational institutions comprise this sub-sector. These are: PTIs, TTC, TTTC, VTTI Physical Education College, HSTTI and Bangladesh Madrasahs Teacher training Institute (BMTTI). This sector has been growing slowly. Total number of institutions was 68 in 1995, 143 in 2003 and 215 in 2014.

Among 215 institutions, 38% were government and 62% were privately managed. The percentage by type of institution was: 52% was TTC, 26% PTIs, 14% was physical education college, and 8% was other institutions. More than 29% were located in Dhaka Division, 18% in Chittagong, 17% in Khulna, 15% in Rajshahi and 20% in the rest 3 divisions. This confirms uneven distribution between divisions. There were only 1 TTTC and 1 VTTI in the country and both were in Dhaka.

Total students in 215 institutions were 34644, average 162 per institutions. Among all students girls were 34% GPI was 55%, Percentage of girls was highest in PTIs, 40% and lowest (0%) in TTTC and VTTIs. Average enrolment per institution was 245 in PTIs, 164 in TTCs, 70 in TTTC, 122 in VTTI, 117 in Physical Education College, 437 in HSTTI and 1856 in BMTTI, showing large variation between types.

The 2014 institutional survey found 2669 teachers in 215 institutions, average 12.4 teachers per institution. Among all teachers 21% were female. This percentages show variation between types of institutions. Gender parity index for all types of institution was only 26%. Teacher-student ratio was 1:16 in the teacher education sub-sector.

Technical and Vocational Education:

This subsector is diverse, catering to more than 689663 students, involving many stakeholders (for example 14 types of providers). Types of institutions involved were: Polytechnic, Technical school and college, Glass and ceramic. Graphic Arts, Survey Institutes, TTC Textile institutes, Textile vocational, Agricultural training institute, Marine Technology, SSC Vocational (independent) HSc Vocational (independent), HSC Vocational (attached) and HSC business management (BM). This is increasingly growing sub-sector: total institutions were 147 in 1995, 2314 in 2003, and 4014 in 2014; total students were 39650 in 1995, 45965 in 2003 and 689663 in 2014.

Among 4014 institutions, 60% were HSC vocational, 21% were SSC Vocational, 7% polytechnic, 4% technical school and college and 8% were other institutions.

Majority institutions (93%) were privately managed and only 7% were public managed. Division wise distribution shows that 25% were located in Dhaka division, 23% in Rajshahi, 17% in Rangpur, 16% in Khulna, 9% in Chittagong, 8% in Barisal and 2% in Sylhet.

Total enrolment in all 4014 institutions was 689663. On average 171.8 students per institution. Chapter -one: Introduction, objectives and survey methodology

Introduction

Education plays pivotal role in the development of any country. It is world-wide recognized that a rapid improvement of education is sine-qua-non for accelerating economic, social and human development. The overall development can be achieved through proper and well-planned education system catering to the diverse needs of the nation.

Considering the importance of education in building the nation all the governments in Bangladesh regardless of their political character, affiliation and ideological learning's appeared to have assigned a high priority to the expansion of access, equity and quality of education at all levels. The present government also has taken different steps including adopting national education policy (2010) for the development of the education system with the firm impression to build digital Bangladesh.

In order to achieve the goal of vision 2021, effective education planning and management are very much essential. Updated, reliable and accurate data set is indispensable for the coherent educational planning, development and management of educational system in Bangladesh. The MOE is responsible for the planning and development of education sector. It is also responsible for the effective and efficient management of the educational institutions of the country. To this end the MOE entrusted the BANBEIS with the responsibility of providing valuable and authentic information. The MOE asked the BANBEIS to follow scientific methods to establish facts and figures for taking appropriate decisions.

With a view to providing accurate and up-dated data set for planning, development and management of the institutions as well as monitoring the progress (changes) of the sector and sub-sectors, the BANBEIS starting from 2008 regularly conducted a census of all educational institutions involved in offering post-primary education. For primary education the BANBEIS uses the data set regularly collected by the DPE through annual census of primary schools.

It is intended to collect through the education surveys all relevant data from all educational institutions for knowing the parameters of important variables such as access, equity, quality, continuation, drop-out, transition in relation to student's participation, teaching and other facility available in the respective institutions. The target population is enormously large. The number of variables in each subsector is also big. The tasks involved are therefore gigantic and it not properly executed, there are changes of non-sampling errors. The BAMBEIS has been developing quality assurance measures to minimize the non-sampling errors.

The last National educational census (base-line) was conducted in 2008. Changes are continuously taking place. The number of institutions in each subsector, their enrolment, and teachers involved, facility is continuously changing. Many changes took places in the education sector. There have been spectacular increases in the number of institutions enrolment teachers all over the country. It is necessary to know whether equity and quality have been maintained, whether girls are enjoying the fruits of expansion or disadvantaged tribes or social

groups remain included as before. The existing data base needs to be up-dated to meet the present day challenges facing the education sector. It is urgently felt the need for strengthening data base at the BANBEIS. The BANBEIS has been conducting the survey regularly since 2008. The surveys 2009-2014 were conducted and the reports up to 2013 were published. The present report consisting Statistical tables along with analysis in some cases.

Aims and objectives of educational survey 2014

The aims of the 2014 survey are;

- (a) To collect up to date quality data for 2014 from all post primary education institutions to build a strong data base and add the information of new institutions and delete the information of abolished institutions from the data base.
- (b) To develop skill of the BANBEIS in respect of conducting the surveys, monitoring, evaluation and research.
- (c) To increase information awareness of teachers and administrators working in education with the data collected through the surveys and to simultaneously make both the data providers and users aware of the importance of facts and figures.
- (d) To impart training to the teachers and administrators working in education for developing skill in filling up the questionnaires and also use of facts and figures.

Specific objectives of the survey 2014.

The specific objectives of the 2014 survey are;

- (i) To update existing data base for post-primary education.
- (ii) To publish yearly education statistics 2014 and prepare a post-primary education directory.
- (iii) To increase information awareness among all stake holders (teachers, managers, administrator, researchers and other users of information)
- (iv) To make all information available to help research.
- (v) To evolve methodology for assessing the efficiency of educational institution.

Scope of the educational institution survey 2014.

All the educational institutions imparting post primary education constitutes the population. Every institution was the unit of measurement. Every upazila/thana served as enumeration area. Special attention has been accorded to cover all post-primary education insituation.

Survey Methodology.

Appropriate methods and techniques were employed to conduct the survey. The following approaches were followed:

1. Pre-survey activity

The following important activities were undertaken to ensure the effective and efficient implementation of the survey:

- (a) In order to know what data were to be collected, BANBEIS had several meetings with the users and providers of data and shared their views.
- (b) Upazila secondary education officers(USEOs) after getting necessary orientation worked sincerely to distribute all type of Questionnaires to Heads of institution as per updated lists supplied by BANBEIS of all post primary institutions in their respective upazilla BANBEIS is supplied the lists by type, management and location. All precautions were taken to ensure inclusion of all intuitions. The lists were very useful to determine the number of questionnaire and field work plan.
- (c) All district and upazilla level officers and teachers were given orientation training to understand the importance of the survey, importance of their role to obtain reliable and valid data and importance of their participation in and contribution to the survey.
- (d) For all the officers of BANBEIS orientation/workshops were conducted to train the participants on how to prepare the Questionnaires implement the survey and monitor the field work.
- (e) Series of consultation meetings were held to prepare pretest and finalize the questionnaire and also manuals for the field survey.

2. Questionnaires: Drafting and finalization

Ten questionnaires were developed for 2014 survey. In view of the types and levels of education the following questionnaires were used for annual education survey 2014.

(1)Unified Q-1 for schools (2) Unified Q-2 for madrasah (3) Unified Q-3 for colleges (4) Unified Q-4 for school and colleges (5) Q-5 for Technical and vocational (6) Q-6 for professional Education and (7) Q-7 for Teachers Training colleges (8) Q-8 for public Universities (9) Q-9 for Private Universities and (10) Q-10 for English medium schools.

These Questionnaires were sent to relevant offices for their opinions. Their comments were incorporated in these Questionnaires. The revised questionnaires were duly pre-tested. The valuable comments/observations obtained during pre-tests were considered during finalization of Questionnaires.

3. Data collection, supervision, and monitoring:

For the first time, BANBEIS introduced e-survey for data collection from the education institutions. The data were collected through on-line technology. All the USEOs/Assigned officers, DEOs and DDs were given rigorous training in nine different venues in the country on how to fill up on-line questionnaires. After receiving the training the USEOs/Assigned officers oriented the head of the institutions in their respective upazila/thana. They also distributed the survey manuals and other materials received from BANBEIS to the institutions. Data collection started on 01 October 2014 and continued up to 31 December 2014. The whole

activities were supervised and monitored by officials of BANBEIS and the Ministry of Education.

4. Data quality control: BANBEIS took all measures to ensure the quality. The following steps were undertaken to ensure quality.

i.) Post enumeration check (PEC)

ii.) Computerized data cleaning

i.) Post enumeration check (PEC)

Post Enumeration Check (PEC) is a standard practice to measure the extent of error incurred in the survey and thus adjust the data collected through 2014 survey. According to census plan BANBEIS conducted post enumeration check to ensure quality and consistency of data. The PEC was carried out on a sample basis. The PEC covered schools, colleges and madrasa. The sample size was determined using standard statistical formula

$$n = \frac{z^2 p (1-p)}{d^2} \text{ (deft)}$$

$$= 618 \text{ for } Z = 1.96, p=q=0.5, d=.05, \text{deft}= 1.61$$

Allocation = 620 for convenience of allocation to 3 categories were: 380, 60, and 180 respectively to schools, colleges and madrasa. The data set collected through the PEC compared with the sample data set collected through the survey-2013. To our satisfaction we found that the survey-2013 data were reliable and valid.

iii.) Computerized data cleaning: Data cleaning was done by using statistical package software Like STATA.

5.) Data processing: Oracle based database software was developed, in-house which entry edit and reporting models. The entry form was developed using developer 6i while oracle was used at the backend. Data entry was made from all the filled in questionnaires and post entry editing and cleaning was also made before reporting.

6.) Reporting: The initial job was to develop a tabulation plan. This was followed by generation of dummy tables. The dummy tables formed the basic tatement of the report. Finally the dummy tables were linked to datasets in the database and the data tables were created. The data tables were then edited to give the present view. So the reporting flow was as follows:

Tabulation plan → dummy tables → database → data tables' → statistical tables → report.

Limitations

The Annual Education Survey-2014 covers 10 types of institutions located all over Bangladesh. Record keeping of most institutions was found weak and unsystematic. So data insert by the Heads of institution was inadequate in some cases. Some Universities, Medical colleges and English medium schools did not comply with BANBEIS request. The UGC data-2013 for some Universities and estimated data of medical and other institutions were used while preparing this report.
