Message

Education is the most powerful tool for a country to achieve sustainable development. Bangladesh is determined to ensure quality and global standard education in harmony with the changes across the world. For achieving the SDG4 targets by 2030, effective and efficient education planning and management is mandatory. Efficacious planning and management is dependent on accurate and updated information.

The government has taken different policies, programme and projects to ensure quality education and remove all sorts of discrimination regarding race, religion, cast, gender in education sector. Bangladesh Bureau of Educational Information & Statistics (BANBEIS) is supporting these initiatives of the government by providing essential educational information to the stakeholders.

I am delighted to know that BANBEIS has prepared a holistic report titled 'Bangladesh Education Statistics 2019' on the basis of collected data through online Annual Education Survey 2019. I firmly believe this report will present a comprehensive status of the education sector of Bangladesh and it will be able to draw the attention of those who want to contribute in educational development of the country.

I would like to congratulate the members of the survey team on their painstaking efforts to bring out the report in time. I also express my heartiest appreciation to the Director General of BANBEIS whose robust leadership was essential to complete this laborious job in stipulated time.

As we know data plays a vital role in addressing problems and making fruitful solution to that. Data governance can ensure transparency and accountability in all public service sectors. I appreciate the endeavors of BANBEIS for its contribution in this regard over the years.

The present Government has been taking a lot of initiatives for the further improvement of education sector. I believe that this holistic report will help our stakeholders and policy makers bring prospective changes in education sector and achieve SDG4 goals. I hope all the concerned will find this report helpful in getting actual data for policy making and other purposes.

Message

Education is indispensable for ensuring the sustainable development of every country. After achieving a great success in Millennium Development Goal (MDG), Bangladesh has been trying for more significant changes in education sector to achieve Sustainable Development Goal4 (SDG4). In line with this Bangladesh is making incessant attempts for ensuring quality and standard education for managing the challenging waves of globalization.

Bangladesh Bureau of Educational Information and Statistics (BANBEIS) collects, compiles and disseminates educational statistics for relevant stakeholders. I am immensely pleased that BANBEIS is going to publish the 'Bangladesh Education Statistics 2019' based on the data collected through online survey. I hope, the data contained in this Report will play a vital role in formulating short and long term policies, plans and development strategies. I believe, this attempt will provide adequate and reliable information to the stakeholders to determine the strategies for the Five Year Plan and Annual Development Program (ADP) to achieve the goals of Vision 2021 and Vision 2041 of the Government led by the Honorable Prime Minister Sheikh Hasina.

I would like to thank all team members who were involved in the process of conducting this survey as well as publishing this Report. I would also like to convey my heartiest thanks to the Director General of BANBEIS for his sincere endeavors in publishing this Report.

Message

Updated and reliable education statistics are inevitable for effective planning, development and educational management. I am very delighted to know that Bangladesh Bureau of Educational Information and Statistics (BANBEIS) has completed the online Annual Education Survey 2019 and prepared a comprehensive report based on the findings of the survey, highlighting the key education indicators, statistics and time series data. I believe this report will project a comprehensive picture of the country's education sector very successfully.

We must admit that for effective human resource management and manpower planning there is no alternative to obtaining real data and statistics and it has been one of the most vulnerable areas we have been struggling with while competing for global job market. But in the recent time, BANBEIS, a storehouse of educational information and statistics, has been doing a great job by collecting need-based data from its stakeholders at the grassroot level, which ultimately will help the policy makers for skilled manpower planning.

This report will also be helpful in determining information and evaluation of goals and strategies of the 7th Five year plan and the vision 2021 and SDG4 targets. I believe this report will serve as a vital source of information to those who work on educational policy, standards and other aspects.

My heartiest thanks and appreciation to all those who have significantly contributed towards completing this report.

Wish you all the best.

Preface

With a mandate of collecting, sorting, analyzing and publishing post-primary educational statistics Bangladesh Bureau of Educational Information and Statistics (BANBEIS) was established as one of the recommendations of Qudrat-e-Khuda education commission, the first education commission of Bangladesh formed by our great leader Father of the Nation Bangabandhu Sheikh Mujibur Rahman in order to prepare an appropriate education policy with a vision of building a well-educated nation.

As the only agency responsible for disseminating education statistics, BANBEIS has been publishing an annual report of educational information covering all levels of education over the years.

The annual report entitled '**Bangladesh Education Statistics 2019**' is an attempt to publish educational statistics at all levels for the year 2019. The comprised data in this document are collected through the online self-responding method from all the post-primary educational institutions. In this method, all educational institutions updated the respective database information online and sent it through the internet. Quality Assurance (QA) process took place for validation. Databases have been developed in ORACLE 11g using ORACLE Developer 2010. All possible efforts have been employed to bring out this comprehensive and quality statistics, which will be helpful for educational planning and management purposes.

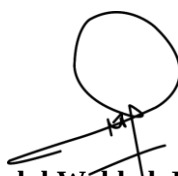

This report will hopefully be useful for the Government, NGOs and Private sectors along with the Development partners of Bangladesh for educational planning and future investment in the education sector. I would like to express my gratitude to all the concerned officers and staffs of BANBEIS for their significant contributions in preparing this valuable report.

I would also like to take the opportunity to thank all the heads of institutions, teachers, field officers (DEO, USEO) and others who have provided their momentous inputs to publish this report. Special thanks to DPE & UGC for their collaboration to prepare this overall report consisting of all level of education.

Although every year this report had been published in March, due to the long general holiday caused by COVID-19 pandemic, this year it could not be published within the scheduled time frame despite the high demand of various national and international agencies.

Though all the concerned have tried their best to make an unerring report, there may be some unwilling errors in it. It will be highly appreciated if any constructive suggestion or correction has been pointed out; such suggestions will help us to make the report more immaculate in the next edition.

Class size: The average number of students together in a class enrolled.

Teacher Student Ratio (TSR): Refers to the proportion of teachers in relation to the number of students in an institution. Calculated by dividing the total number of students in a school or group of school by the total number of teachers them.

Urban Area: Refers to the area covered by municipalities, Upa-zila Head Quarters, District Head Quarters and City Corporations in the country.

Cohort Survival Rate: percentage of Students enrolled at the beginning grade/year of the level of education who reached the final grade/year at the end of the required number of year to the level of education.

Dropout Rate: refers to the percentage of students of any reason leave educational institutions (in any given grade or level) and did not come back to finish the grade or level during that school years of that level of education.

Completion Rate: The percentage of pupils/students in the beginning grade/year of the level of education who finished or graduated from the final grade/year at the required number of years of that level of education.

Gross Enrolment Rate: Refers to the total enrolment of Students in a grade or level of education, regardless of age, expressed as percentage of the corresponding eligible official age- group population in a given school year.

Net Enrolment Rate: Refers to the number of students enrolled in the official specific-age group expressed as a percentage of the total population in that age group.

School age Population: Population of the age group theoretically corresponding to a given level of education as indicated by theoretical entrance age and duration e.g the population from ages four ages to thirty inclusive regardless of the existing requirements of compulsory education or the period of education provided for in various types of schools.

Co-efficient of Efficiency: It is a ratio of Expected student years' student years required to complete the cycle by the graduates and the total years actually spent to produce those graduates expressed in percentage terms. The ideal (optimal) number of pupil-years required (i.e.in the absence of repetition and dropout) to produce a number of graduates from a given school-cohort for secondary education expressed as a percentage of the actual number of pupil-years spent to produce the same number of graduates.

This is a synthetic indicator of the internal efficiency of an educational system. It summarises the consequences of repetition and dropout on the efficiency of the educational process in producing graduates. **School Expectancy:** The number of years a person of School entrance age can expect to spend within the specified level of Education.

Executive Summary

Introduction:

The education system of Bangladesh is comprised of mix of heterogeneous providers. A variety of schools operate within the country; government run schools, privately run schools and madrasah, English medium schools (British Curriculum), schools run by NGOs and kindergarten schools. Primary education spans grade 1-5; Junior secondary grades 6-8, secondary grade 9-10, higher secondary grade 11-12 and tertiary education grades 13 and above. It is noted that the government is going to implement primary education comprising from grade I-VIII.

Bangladesh has a centralized Education system administered by the Ministry of Education (MOE) with two divisions viz, Secondary and Higher Education Division & Technical and Madrasah Education Division (TMED) and the Ministry of Primary and Mass Education (MOPME). The MOPME and DPE are responsible for planning and management of primary, mass and pre-primary education. The MOE, DSHE and DTE are responsible for post-primary education. The MOE and UGC look after the overall management of tertiary education.

Education is the pivotal tool of the development of any country. Given this view the incumbent government has been giving top most importance to the expansion of education. For the past decade Bangladesh has been investing more to achieve the education Millennium Development Goals (MDGs). Besides reducing poverty, Bangladesh has made spectacular success in improving access to education. The gross enrolment ratio in primary education in 2019 has reached 109.49% and net enrolment rate 97.34%. The gross enrolment ratio in secondary education in 2019 reached 75.62% while net enrolment rate 67.30%. Bangladesh has achieved gender parity for educational access in both primary and secondary education (well in advance of their 2015 MDGs). Now disparity in favor of girls student both primary and secondary level. The number of out of school children has been continuously decreasing both in absolute and relative term. Bangladesh education system is large, catering to over 36.05 million students (2019), involving many stakeholders (for example there are 14 types of providers in primary education, 11 examination boards at the secondary levels, about 96.73% secondary education institutions are privately managed).

For the planning and development of the education sector, the ministries need a complete quality database. With a view to up-dating the database, BANBEIS regularly conducts post-primary education surveys. The base-line survey was conducted in 2008 after that the annual survey was conducted in 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018 and 2019. The purpose of Bangladesh Education Survey is to provide up-dated educational information and key performance indicators to the policy makers and other stakeholders. The scope of Annual Survey 2019 was very broad. All the educational institutions imparting post-primary education were covered.

The present report based on Educational Survey 2019 data do not fully address issues such as management, governance, equity and non-teaching staff. The socio-demographic characteristics of students and teachers were not considered. One limitation of the survey is the difficulty in obtaining data from English medium schools, Medical Colleges and Universities. The Annual Education Survey 2019 has used 10 type questionnaires, one for each types of institution. The questionnaires were presented to the Stakeholders Consultation Workshop and took feedback and incorporated it before finalization. The questionnaires were also pretested before finalization.

Questionnaires were up-loaded to Website viz; www.banbeis.gov.bd to fill up and sent it to BANBEIS server through On-line. The data collection started on 14.10.2019 and continued up to 25.10.2019. Editing was done at the field (USEO office) and head office to ensure quality of data. Besides, Post Enumeration Check (PEC) was done for School, College and Madrasahs to minimize errors. It was found that the main survey data were reliable and valid. According to the Annual Survey 2019, there were 171779 Educational institutions in the country. This number was 176053 in the year 2018.

Primary Education:

Annual Primary School Census (APSC) 2019 was conducted by The Directorate of Primary Education (DPE) and the data shown in this report about primary education as secondary sources.

Bangladesh primary education (Preprimary to Grade V) system is very large, catering to 20.12 million students in 2019 through 25 types of providers. Among them the government primary schools alone covered 14.10 million (70.07%) students. The total number of girl students was 10278844 (51.08%). The GPI 1.04 i.e. parity exists. In 2019 total teachers (GPS only) were 356366 with female teachers were 64.52% of all teachers. Variation was observed between types of primary education institutions (Table 2.3)

Pre-primary education enrolment (Table-2.2) was 3786241 among them 1892507 (49.98%) were girls. Drop-out was prevalent in every grade, the rate was higher in grade 4 (Table 2.23)

Gross Intake Rate (GIR) and Net Intake Rate (NIR) was 110.51% and 96.50% respectively. A small difference was observed between boys and girls. Gross Enrolment Ratio (GER) and Net Enrolment Rate (NER) in primary education have been increasing during the past decades. GER was 107.7% in 2010 and reached 109.49% in 2019. GER of girls (113.20%) was higher than that of boys. NER in primary education was 94.8% in 2010 and increased to 97.34% in 2019. The growth was spectacular and confirms continuous increase of access of school age children to education.

Drop-out rates have been continuously decreasing from 39.80% in 2010 to 17.90% in 2019. Compared to boys, the girls' drop-out rate was lower (Table 2.24). Survival rates have shown a continuous growth trend (from 67.00% in 2010 to 85.20% in 2019)

As a result of increasing the growth of access, retention and survival of students the primary education coefficient of efficiency rate has been increasing from 62.30% in 2010 and rose to 82.60% in 2019. In 2009 pass rate in primary completion examination was 89% (88% for girls). The pass rate increased to nearly 95.50% (for both boys and girls) in 2019.

Junior, Secondary and Higher Secondary Education:

Total institutions offering Junior and Secondary education were 20660 in 2019 including 630 upgraded government primary schools having student from grade VI to VIII. The number of institutions in this sub-sector was 12012 in 1995, has been smoothly increasing. Side by Side the enrolment and teachers also increased. In 2019, the total enrolment was 10.35 million among them 5.57 million (53.83%) were girls giving gender parity index near 1.17. The number of students per institution was 501 in 2019. Total teachers were 246845 with 63197 female teachers. The percentage of female teachers was 25.60 % in 2019 and 20.28 % in 2005. In 2019, the teacher-student ratio (TSR) was 1:42 and the average number of teachers per institution was only 12. Among all teachers 67% were trained. This percentage was 26.49% in Junior Schools 70.42% in Secondary School and 72.69 % in School & College (Table-3.4.4).

In the total institution in 2019 the share of Junior Secondary institutions was 11.52%, Secondary institutions 79.31%, School and Colleges 6.12% and Upgraded Govt. Primary Schools 3.05%. Among all institutions 20660, 96.73% were privately managed and only 3.27% was publicly managed (Table-3.1.2). Rural-Urban distribution reveals that in 2019, 76.08% of institutions were located in rural areas, 68.31% of teachers were working in the rural institutions, and 70.05% student was studying in the rural institution.

Relatively more institutions have computer facility; 42.27% of junior secondary, 92.91% of secondary, 99.68% of School & College, 87.32% of all institutions (Table-3.5.3). Table 3.5.4 gives an account of the use of teaching materials. It is seen that nearly 89.45% of institutions reported the use of various teaching materials.

It is reported that 79.47% of all institutions have computer teacher though Computer education is Compulsory for Secondary education. This percentage was 36.76% for Junior Schools, 84.82% for secondary schools and 90.51% for School & College (Table 3.5.5). It is found that 80.83% of institutions had interned facilities in 2019. In total, the amount was 126925.67 million in 2018-19 (Table 9.8).

Out-put Statistics:

The number of students appeared in SSC examination has been gradually increasing. Total students appeared in SSC was 435918 in 1990, 756387 in 2004 and 1422379 in 2017 and 1694652 in 2019. The growth was more than 272% the growth of girls was higher than boys, 468% for 28 years. Spectacular growth occurred in the pass rate. Percentage of pass was 32% (30% girls) in 1990, rose to 82.80% (83.54% girls) in 2019. The pass rate was higher in the science group 93.07% in 2018 and 94.72% in 2019 lower in the Humanities group.

Participation in vocational examination (SSC) and the percent of pass in examination showed a continuously increasing trend. The percentage of pass was 68% in 1999, raised to 79% in 2017, 71.96% in 2018 and 72.24% in 2019. Girls' performance was higher 82% in 2017, 76.35% in 2018 and 76.67% in 2019. Statistics on number appeared in HSC and percentage of pass reveals a continuous growth. The number of students appeared increased almost three fields. Percentage of pass was 30% (31% girls) in 1990 and increased to 67% in 2017 (girls 69%) but 64.55% (68.18%) in 2018 and 71.85% (74.84%) in 2019. In HSC the performance of Science group was better compared to Business Studies and Humanities group. Participation in Dakhil, Alim, Fazil and Kamil examination of madrasah streams and their pass rate showed a continuous growth. The Current pass rate in all the above four examinations was more than 75% (Dakhil 83.03%, Alim 88.56% in 2019).

Results of SSC and Dakhil graduates with grade point also reveals spectacular improvement over time. In 2004 a total of 8597 got GPA 5 (A+) in SSC. This number increased to 94556 in 2019, the growth was 11 times. Similarly, in Dakhil GPA 5 score was obtained by 1288 in 2004, 11338 in 2015, 5895 in 2016, 2610 in 2017, 3371 in 2018 and 6287 in 2019 which 2916 higher than that of 2018. This number increased by 2 times. A similar trend was found in SSC (Vocational) and HSC graduates with grade points (Table: 10.13 and 10.14). Results of Degree (Pass) examination for the period 2002-2017 were presented in table (10.20). The trend analysis showed continuous increase in 2015, 2016 and 2017 of number appeared and the pass rate was increased in 2015 and 2016 but decreased in 2017. In 2002, the number appeared at about 262808 and the number decreased to 217124 in 2017. The pass rate was 31.2% in 2002 and rose to about 72 % in 2017. The female pass rate was higher in 2002 and also in 2016. The continuous introducing honors course in degree and above level colleges by the national university are the main reason for decreasing degree pass students.

Introduction, objectives and survey methodology

Chapter -one: Introduction, objectives and survey methodology

Introduction

Education plays key role in the development of any country. It is world-wide recognized that a rapid improvement of education is end result for accelerating economic, social and human development. The overall development can be achieved through proper and well-planned education system catering to the diverse needs of the nation.

Considering the importance of education in building the nation all the governments in Bangladesh regardless of their political character, affiliation and ideological learnings appeared to have assigned a high priority to the expansion of access, equity and quality of education at all levels. The present government also has taken different steps for the development of the education system with the firm impression to build digital Bangladesh.

In order to achieve the goal of vision 2021, effective education planning and management are very much essential. Updated, reliable and accurate data set is indispensable for the coherent educational planning, development and management of educational system in Bangladesh. The MOE is responsible for the planning and development of education sector. It is also responsible for the effective and efficient management of the educational institutions of the country. To this end the MOE entrusted the BANBEIS with the responsibility of providing valuable and authentic information. The MOE asked the BANBEIS to follow scientific methods to establish facts and figures for taking appropriate decisions.

With a view to providing accurate and up-dated data set for planning, development and management of the education institutions as well as monitoring the progress (changes) of the sector and sub-sectors, the BANBEIS starting from 2008 regularly conducted a survey of all educational institutions involved in offering post-primary education. For primary education the BANBEIS uses the data set regularly collected by the DPE through Annual Primary School Census.

It is intended to collect through the education surveys all relevant data from all educational institutions for knowing the parameters of important variables such as access, equity, quality, continuation, drop-out, transition in relation to student's participation, teaching and other facility available in the respective institutions. The target population is enormously large. The number of variables in each subsector is also big. The tasks involved are therefore gigantic and it not properly executed, there are chances of non-sampling errors. The BANBEIS has been developing quality assurance measures to minimize the non-sampling errors.

The last education Census in the name of National Educational Survey of (NES) (base-line) was conducted in 2008. Changes are continuously taking place. The number of institutions in each subsector, their enrolment, and teachers involved, facility is continuously changing. Many changes took places in the education sector. There have been spectacular increases in the number of institutions, enrolment and teachers all over the country. It is necessary to know whether equity and quality have been and maintained, whether girls are enjoying the fruits of expansion or disadvantaged tribes or social groups remain included as before. The existing database needs to be up-dated to meet the present day challenged facing the education sector. It is urgently felt the need for strengthening database at the BANBEIS. The BANBEIS has been conducting the survey regularly since 2008. The surveys 2009-2018 were conducted and the reports up to 2018 were published. The present report consisting statistical tables along with analysis in some cases.

Aims and objectives of educational survey 2019

The aims of the survey 2019 are;

- a. To collect up to date quality data for 2019 from all post primary education institutions to build a strong database and add the information of new institutions and delete the information of abolished institutions from the database.
- b. To develop skill of the BANBEIS professional in respect of conducting the surveys, monitoring, evaluation and research.
- c. To increase information awareness of teachers and administrators working in education with the data collected through the surveys and to simultaneously make both the data providers and users aware of the importance of facts and figures.
- d. To impart training to the teachers and administrators working in education for developing skill in filling up the questionnaires and also use of facts and figures.

Specific objectives of the survey 2019

The specific objectives of the Survey 2019 are;

- I. To update existing database for post-primary education.
- II. To publish Bangladesh education statistics 2019 and prepare a post-primary education directory.
- III. To increase information awareness among all stake holders (teachers, managers, administrator, researchers and other users of information)
- IV. To make all information available to help research on educational issues;
- V. To evolve methodology for assessing the efficiency of educational institution.

Scope of the educational institution survey 2019.

All the educational institutions imparting post primary education constitutes the population of this Survey. Every institution was the unit of measurement. Every upazila/thana was considered as enumeration area. Special attention has been accorded to cover all post-primary education institutions.

Survey Methodology

Appropriate methods and techniques were employed to conduct the survey. The following approaches were followed:

1. Pre-survey activity

The following important activities were undertaken to ensure the effective and efficient implementation of the survey:

- a. In order to know what data were to be collected, BANBEIS conducted consultation workshops/seminars/meetings with the users and providers of data and shared their views. After getting feedback from workshop questionnaires were finalized;
- b. After finalizing questionnaires, a on-line data entry software was developed and uploaded to BANBEIS website for data provide;

2. Questionnaires: Drafting and finalization

A total of ten questionnaires were developed for survey 2019. In view of the types and levels of education the following questionnaires were used for annual education survey 2019.

(1) Unified Q-1 for school (2) Unified Q-2 for madrasah (3) Unified Q-3 for colleges (4) Unified Q-4 for school and colleges (5) Q-5 for Technical and vocational (6) Q-6 for professional Education and (7) Q-7 for Teachers Training colleges (8) Q-8 for public Universities (9) Q-9 for Private Universities and (10) Q-10 for English medium schools.

These Questionnaires were sent to relevant offices for their opinions. Their comments were incorporated in these Questionnaires. The revised questionnaires were duly pre-tested. The valuable comments/observations obtained during pre-tests were considered during finalization of Questionnaires.

3. Data collection, supervision, and monitoring

BANBEIS has introduced e-survey for online data collection directly from the education institutions. After completing data entry and updating by the Institutions, it has been verified by the USEOs/assigned officers and submitted data in the central database of BANBEIS. Online data collection started on 14 October 2019 and continued up to 25 October 2019. The whole activities were supervised and monitored by field officials of BANBEIS and the Ministry of Education.

4. Data quality control

BANBEIS took all measures to ensure the quality of data. The following steps were undertaken to ensure quality.

- i. Post Enumeration Check (PEC)
- ii. Computerized data cleaning

4.1 Post Enumeration Check (PEC)

Post Enumeration Check (PEC) is a statistical practice to measure the extent of error incurred in the survey and thus adjust the data collected through 2019 survey. According to survey plan BANBEIS conducted post enumeration check to ensure quality and consistency of data. The PEC was carried out on a sample basis. The PEC covered school, college and madrasha. The sample size was determined using standard statistical formula $n = \frac{Z^2 p(1-p)}{d^2}$ (def_t) = 460 for $Z = 1.96$, $p = q = 0.5$, $d = 0.05$, def_t = 1.20

Allocation = 460 for convenience of allocation to 2 categories were: 303, def_t = 1.20 respectively to schools, colleges and madrasha. The data set collected through the PEC compared with the sample data set collected through the survey 2019. To our satisfaction we found that the survey 2019 data were reliable and valid.

4.2 Computerized data cleaning

Data cleaning was done by using statistical package software like SPSS and STATA.

5. Data processing

Oracle based database software was developed, in-house with entry, edit and reporting models. The entry form was developed using Php and Java while oracle 11g was used at the backend. Data entry was made online directly from the institutions and post entry editing and cleaning was also made before reporting.

6. Reporting

The initial job was to develop a tabulation plan. This was followed by generation of dummy tables. The dummy tables formed the basic statement of the report. Finally the dummy tables were linked to datasets in the database and the data tables were created. The data tables were then edited to give the present view. So the reporting flow was as follows:

Tabulation plan → dummy tables → database → data tables → statistical tables → report.

7. Limitations

The Annual Education Survey 2019 covers 10 types of institutions located all over Bangladesh. Record keeping of most institutions was found weak and unsystematic. So data insert by the Heads of institution was inadequate in some cases. Some Universities, Medical colleges and English medium schools did not comply with BANBEIS request. The data for universities were taken from the annual report 2019 published by BUGC and estimated data of medical and other institutions were used while preparing this report.

Bangladesh Bureau of Educational Information and Statistics (BANBEIS)

Ministry Of Education (MoE)

Validation Sample Survey (VSS) Report 2019

(Post Enumeration Check)

Statistics Division, BANBEIS, Dhaka, Bangladesh

June 2020

Introduction

For the effective and efficient management and monitoring the progress of Education sector BANBEIS regularly conducts an Annual Education Institution Survey (AEIS) of Post-Primary Education levels. The *AEIS* collects data from all Post-Primary Education Institution. According to the 2019 *AEIS* there were 42521 Education Institutions, 19711063 Students and 597913 teachers. In 2019 there were 20660 Secondary Schools, 9278 Madrasahs. AEIS data of 2019 gives a total view of Schools and Madrasahs. Among other the AEIS collects data from all Secondary Schools and Madrasahs for knowing the parameters on important variables such as enrolment, attendance, dropout, pass-rate, teachers, and training facility available at the institution level. The target population in respect of each variable is enormously big. If data collection is not properly done, there the chance of non-sampling error increases. These errors effect the reliability and validity of the estimates. To improve reliability and validity of the survey data the BANBEIS regularly conducts validation sample Survey. The Validation Sample Survey (VSS) is a standard practice designed to know the extent of errors present in the AEIS data.

The VSS 2019 was designed to assess primarily the quality of 2019 AEIS data in relation to some important variables such as enrolment, and repetition etc.

1.2. Objectives of 2019 VSS data

The objectives are:

- To assess the quality of 2019 AEIS data
- To assess the level of accuracy of selected indicators
- To make necessary corrections of data of indicators through correction factor
- To provide recommendations for policy decision to be applied in the next AEIS

1.3. Scope of Work

To achieve the objectives of the VSS 2019 it is necessary to collect relevant data through a nationally representative sample of Schools and Madrasahs. For every sample school collect data for each variable will be established. This data set will be compared with AEIS data set to assess the level of accuracy of AEIS data set. The validation is expected to identify main factors for incorrect recording and making AEIS data accurate. The VSS report will include recommendations on how to improve the quality.

1.4 Sample Size for the VSS2019

Let n is the sample size for the validation sample Survey. We have two sets of data for the same indicator, say enrolment of a class.

$x_{1c}, x_{2c}, \dots, x_{nc}$ are n AEIS data $x_{1s}, x_{2s}, \dots, x_{ns}$ are n VSS data. We take $x_{1s}, x_{2s}, \dots$ are n correct data and x_{ic} is correct if $x_{ic} = x_{is}$ otherwise x_{ic} has error incorrect.

For determining r , the Sample size, we consider the variable enrolment, the most important variable.

In case the i th institutions is free from error then $x_{1c}=x_{1s}$

If all Schools are free from errors $\sum (X_{1c}) = \sum (X_{1s})$ or

$\bar{x}_{1c} = \bar{x}_{1s}$, $\bar{X}_c = \bar{X}_s$, Where $\bar{X}_s$ and $\bar{X}_c$ are population mean

If P is the percentage of AEIS Schools with no error, $Q = 1 - P$, n = Sample size then the Standard formula for n is

$$n = \frac{(1.96)^2 pq}{d^2} \times \text{deff}$$

$\cong 440$ for $p=q=0.5$, $d=0.05$ deff 1.2

Thus a random Sample of 460 Institutions (Schools and Madrasahs would provide estimates at 5% level of significance with 95% confidence level.

Total School sample=439

1.5 Selection of Schools and madrasahs

Random Sampling is used to select Sample Schools (294) and Madrasahs (145).

Data Analysis, Findings and Conclusions

2.1 Analysis plan

The AEIS data are available for all schools and Madrasahs. The BANBEIS provided data for the schools and madrasah collected through AEIS 2019. The data set for sample Schools is: $x_{1c}, x_{2c}, \dots, x_{nc}$. The data collected through VSS are; $x_{1s}, x_{2s}, \dots, x_{ns}$. For i th institution the survey observation is x_{ic} and the survey observation is x_{is} .

The difference $x_{ic} - x_{is}$ is the error for the i th school.

$$e_i = x_{1c} - x_{1s}$$

=0 when $x_{1c} = x_{1s}$, positive if $x_{ic} - x_{1s} > 0$, -ve if $x_{1c} - x_{1s} < 0$.

The survey data are free from errors if $e_1, e_2, \dots, e_N$ are all zero for all i . i.e

$(x_{1c} - x_{1s})$ is zero for all $i=1, 2, \dots, N$.

2.2 Total and average errors in the Sample.

$$e_i = x_{1c} - x_{1s}, i=1, 2, \dots, n$$

$$\sum_{i=1}^n e_i = \sum_{i=1}^n (x_{1c} - x_{1s}) = n\bar{x}_c - n\bar{x}_s = \text{for the sample}$$

Average errors per School in the Sample

2.3 Total errors in the population $\bar{x}_c - \bar{x}_s = \bar{e}$

$$N\bar{e} = N(\bar{x}_c - \bar{x}_s) \cong N(\bar{x}_c - \bar{x}_s)$$

2.4 Correction Factor.

$\bar{X}_c$ is the population mean for the survey data

$\bar{X}_s$ is the population mean for the validation set

$\bar{X}_s$ is the true mean of $X_1, X_2, \dots, X_N$

We propose and estimate of $\bar{X}_s$ as follows.

Estimate $\bar{X}_s = \frac{\bar{X}_s}{\bar{X}_c} \bar{X}_c = \bar{X}_c$ (Correction factor= 1.00)

Where $\frac{\bar{X}_s}{\bar{X}_c}$ = correction factor.

A, if $CF = \frac{\bar{X}_s}{\bar{X}_c} = 1$, Survey estimate needs no Correction

$CF > 1$, Survey data provide under Estimate of the true value

$CF < 1$, Survey data provide over estimate of the true value

2.5 Significance of the difference between and

Our null hypotheses $H_0: \bar{X}_c = \bar{X}_s$

- If $|t| > 1.96$ the difference is significant the hypotheses is rejected, correction of survey mean is recommended
- If $|t| < 1.96$, the survey estimate may be taken as true value, no adjustment is required.

2.6 Findings

Table 1: AEIS average value, VSS Average value, t-value, correction factor and H_0 : by type and grade

Grade-10 Science	38.36	40.27	0.95	-0.9468	Accepted (no difference)

The t values against the respective grades confirm that the differences are statistically insignificant. That is, there is no significant difference between the AEIS and VSS values. Correction is not required (table 1).

2.7 Conclusion and Recommendation

For the indicators on enrolment, the relative difference between AEIS average and VSS average is found minimum. So, correction to the AEIS data is not required.

The overall quality of AEIS 2019 data is good and up to the mark. To improve further, training of data management at the institution as well as central levels should be given more emphasis.
