ISU launches BSc in AI, data science

Staff Correspondent  08 July, 2026, 00:16

International Standard University has introduced a Bachelor of Science Engineering in Artificial Intelligence and Data Science, aiming to prepare skilled professionals for the fast-changing technology sector.

The programme received formal approval from the University Grants Commission of Bangladesh on June 24 and will be offered under the Faculty of Advanced Science and Computing, said a press release on Tuesday.

The undergraduate programme has been designed to produce competent engineers with expertise in artificial intelligence and data science to meet the growing demand for technology professionals at home and abroad, while creating opportunities for higher studies and research.

The 152-credit programme includes courses on Artificial Intelligence, Data Science, Machine Learning, Robotics, Cybersecurity and other emerging technologies. Students will also have access to research opportunities, modern laboratory facilities and industry-oriented projects to strengthen practical skills.

To encourage academic excellence, the university has introduced merit-based tuition waivers for eligible students.

The university currently offers programmes through five faculties and eight departments, including business, engineering, humanities, law and public health, according to the press release.
